

Name: _____

Date: _____

Infographic Graphic Organizer

1). What is your statistical question that you will use for your infographic? (This may depend on the graph your team decides to use)

2). Begin to explore the Infographic website, <https://www.canva.com/create/infographics/>, draw a sketch or begin brainstorming what your infographic will look.

3). You will need to include 3 conclusions on your infographic.

1. What is the center of your data calculated by either mean or median (show evidence)

2. Find the variability (the spread) of your data either with the range or IQR (show evidence)

3. Another conclusion of your choice. It must be a percentage (*for example, we noticed that 4 out of 20, or 20%, of students like ice cream.*)
